AUSTRALIA

Study abroad with your professor...
And make the world your classroom.

Tropical Ecology and Environmental Threats
Program dates: May 23–June 13, 2019

Study in Australia this summer under the guidance of Adelphi faculty in the Department of Biology and explore some of the most diverse ecosystems on the planet. During this three-week course, students learn about preserving tropical rain forests and coral reefs amid the Earth’s ongoing biodiversity crisis. In addition to conducting research at Heron Island Research Station, located on an island within the Great Barrier Reef Marine Park, students will visit the Daintree Rainforest, wander through the Cairns Botanic Gardens and sightsee in Sydney. This 3-credit course is open to students of all majors. Students are required to pass a swim test and take 1-credit prep course during the spring semester.

Estimated Program Cost: $3,400 + tuition + airfare

Faculty Leaders

Matthias Foellmer, Ph.D., Associate Professor of Biology
Aaren Freeman, Ph.D., Associate Professor of Biology
